Summary

Java Backend Engineer with experience building microservices and REST APIs using Java and Spring Boot, with additional experience in Generative AI applications using RAG, LangChain, Spring AI, and vector databases.

Projects

NoticeBoard.ai

- Built NoticeBoard.ai, an AI-powered university knowledge assistant using Java, Spring Boot, Spring AI, PostgreSQL, and pgvector, enabling students to query academic documents through natural language.
- Implemented a complete RAG (Retrieval-Augmented Generation) pipeline including PDF ingestion, text extraction, chunking, embedding generation, vector similarity search, and context-aware response generation.
- Built secure JWT-based authentication and RBAC (ADMIN/STUDENT), supporting document management, AI-powered chatbot interactions, and source-based response for transparency

Work Experience

Assistant System Engineer, Tata Consultancy Services

Aug 2025 – Present

- Analyzed and documented data pipelines across Azure Synapse Analytics, SharePoint, Power Automate, Blob Storage and Azure SQL, tracing data sources, transformations, and sinks to improve data flow visibility and reduce onboarding time.
- Collaborated with data team members to clarify pipeline logic and resolve gaps in existing documentation, ensuring accurate and up-to-date process records.

Education

Medicaps University, Indore

Oct 2021 - May 2025

B.Tech in Information Technology, CGPA: 7.57/10

Achievements

Solved 150+ Data Structures and Algorithms problems on LeetCode.

[LeetCode Profile](#)

Skills

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security

Microservices and Related Technologies: Microservices, Service Discovery, API Gateway

Languages: Core Java, Python (Basics)

Databases: PostgreSQL, MySQL

Gen AI: LangChain, Spring AI, RAG, Vector DB, LLM Integration
